OSC Debbie Lindsey reports that WVDEP has requested additional EPA assistance for air monitoring and for communications, specifically assistance in their Joint Information Center (JIC). For the air monitoring, today the Environmental Response Team (ERT) delivered additional data rams and the Regional office is sending three E-BAM particular monitors. Region 3 has also deployed our WV congressional liaison to the County's JIC.

In addition, ATSDR is providing public health consultation on data being collected by the Wood County consultant. EPA along with ATSDR is assisting Wood County with the interpretation of data.

OSC Chris Wagner will arrive this evening and OSC Dennis Matlock will arrive in the morning to provide additional EPA staff to the response. There are also 4 EPA contractors to place the air monitors and collect the data. In addition, OSC Glen Lapsley is coordinating with ATSDR in the Regional office on the sampling data and researching information requests.
